Practice Areas

Learn how we can help you and your business with:

Imports

We help companies by counseling them on international trade laws, customs procedures, and compliance measures to ensure business operations comply with import laws, mitigate risks, and conform to the record keeping and disclosure requirements of US Customs.

Tobacco

We help clients navigate the regulatory framework of the FDA and TTB requirements so that businesses can comply with their reporting requirements, operate lawfully in an ever-changing legal landscape, and be prepared for the inevitable government visit.

Regulatory Compliance

We help business owners create, implement, and maintain policies and procedures (SOPs) to achieve operational legal compliance. Our firm has experience providing recommendations on potential or existing policies based on guidance from government agencies, trends in recent court decisions, and federal, state, and local employment and labor laws.

Business Risk Mitigation

We help businesses to tackle their challenges, especially when it comes to navigating the complexities of highly regulated industries. From forming new corporations to implementing processes and standard operating procedures to ensure day-to-day compliance, we are here to support business owners.
